A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 27, 2003 has been entered.

Claims 7-10 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for fractionating palm fat, does not reasonably provide enablement for a two step crystallization process, high pressure membrane filters or obtaining a trisaturated triglyceride of H# of C16, or the interesterification of hard palm fraction and hard palm kernal fraction. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

The critical matter in claims 7-10 is a part of an originally filed claim. Applicant is encouraged to amend the specification to include the substance of claims 7-10.

Applicant has provided a reference for support of the use of high pressure membrane filters. Accordingly the rejection of the claims for lack of adequate description has been dropped.

Claims 1-6 and 12 are allowed.
